Halloween Treats

After trick-or-treating, I wanted to know how many treats I had. I found that when I tried to put the candy in groups of 3, I had 2 left over. When I tried to put them in groups of 4, I had still had 2 left over and groups of 5 again had 2 left over. How many total pieces of candy did I have?

My brother was able to put his candy into groups of 6, 7 and 8. What is the least amount of candy he could have?
